## 2 Administrative Appendix

This Appendix provides additional background material about the TM Forum and this document.

### 2.1 Use and Extension of a TM Forum Business Agreement

---

This set of documents defines a technology-neutral model of the artifacts related to the Management of Resource Inventory and constitutes the Information Agreement for the corresponding entities and interface operations: TMF612\_MRI. It has been elaborated from the Business Agreement document. While this Information Agreement contains sufficient information to be a “stand alone” document, it is better read together with the Business Agreement document: TMF518\_MRI.

It is expected that this document will be used:

- As the foundation for a TM Forum Interface Implementation Specifications (IIS)
- To facilitate information agreement between Service Providers and vendors
- As input to a service Provider’s Request for Information / Request for Proposal (RFI/RFP—RFX)
- As input for vendors developing COTS products
- As a source of information for other bodies working in this area
